End date: June 6, 2018

For more information visit <https://safety30.co.uk/>

S3 ID will be exhibiting at the Safety 30–Piper Alpha Legacy: Securing a Safer Future Exhibition and Conference. We will be located at **Stand 26**.

Organised by Oil & Gas UK, the event brings people together from the oil and gas industry. The event will reflect on the lessons learned from the tragedy, review the advancement of offshore safety and reinforce efforts for continuous improvement.

The Piper Alpha Disaster, also known as the worst offshore disaster to happen in history occurred 30 years ago in 1988.

The conference will be addressed by Lord Cullen, who chaired the 13-month public enquiry that resulted in over 100 safety recommendations which made history for Health and Safety in the North Sea.
